In Term One, students in Grades Three and Four have been studying the theme Community. Students have been busy researching the different services and facilities in the local community and have prepared oral presentations on one of their choice. In class, we are discussing what makes Sunbury so great and are designing ‘persuasive posters’ to encourage people to live in the area.

We have been extremely fit and active this term, with House Swimming and Athletics sports days. The 3/4 teachers were proud to see their students giving it their best and cheering each other on. Congratulations to those students who were selected to compete at Interschool sports against the other schools in Sunbury.

Another exciting event this term has been the arrival of a class set of laptops! These are shared between the classes in the BER building and has meant other classes can use the ICT room more often! Students in grade three and four have been enjoying computer times with Rapid Typing, Mathletics and lots of other fun maths and literacy games.
